Московский государственный технический университет им. Н.Э. Баумана Факультет «Информатика и системы управления» Кафедра «Автоматизированные системы обработки информации и управления»

Отчет Домашнее задание По курсу «Разработка интернет приложений»

ИСПОЛНИТЕЛЬ:

Группа ИУ5-55Б Камалов М. Р.

"13" января 2021 г.

ПРЕПОДАВАТЕЛЬ:
Гапанюк Ю.Е.

_"____2021 г.

Москва 2021

1. Задание

Создайте прототип веб-приложения с использованием фреймворка Django на основе базы данных, реализующий концепцию master/detail. Прототип должен содержать:

- Две модели, связанные отношением один-ко-многим
- Стандартное средство администрирования Django позволяет редактировать данные моделей. Желательно настроить русификацию ввода и редактирования данных.
- Веб0приложение формирует отчет в виде отдельного view/template, отчет выводит HTML-страницу, содержащую связанные данные из двух моделей.
- Для верстки шаблонов используется фреймворк Bootstrap, или аналогичный фреймворк по желанию студента

Расширенное задание:

• Реализация в отчете (пункт 3 стандартного задания) графика на основе данных отчета с использованием библиотек JavaScript (например, c3js) и развертывание приложения на облачном сервисе (например, heroku)

2. Текст программы settings.py

```
Django settings for lab8 project.

"""lab8 URL Configuration
The `urlpatterns` list routes URLs to views. For more information please see:
   https://docs.djangoproject.com/en/3.1/topics/http/urls/
Examples:
Function views
    1. Add an import: from my app import views
    2. Add a URL to urlpatterns: path('', views.home, name='home')
Class-based views
    1. Add an import: from other app.views import Home
    2. Add a URL to urlpatterns: path('', Home.as view(), name='home')
Including another URLconf
    1. Import the include() function: from django.urls import include, path
    2. Add a URL to urlpatterns: path('blog/', include('blog.urls'))
from django.contrib import admin
from django.urls import include, path
urlpatterns = [
   path('catalog/', include('catalog.urls')),
   path('admin/', admin.site.urls),
